

Steel Pintle Chain

Allied-Locke Steel Pintle Chain is designed for dependability, quality, and economy. The Allied-Locke Steel Pintle Chain is well suited for a wide range of applications, such as salt-sand-fertilizer spreaders, bunk feeders, hay handling equipment and other similar conveying systems.

Allied-Locke Steel Pintle Chains feature all heat treated parts with quad staked pins. The open barrel construction minimizes pin surface contact with the barrel, eliminating freezing due to corrosion. The open barrel design eliminates material build up in the roots of sprockets. This assures smoother operation, uniform link wear, greater resistance to fatigue and longer service life.
