## Steel Detachable Chain

Allied detachable chain is made from special analysis hot rolled strip steel. The links are precision formed for pitch uniformity and heat treated to assure high strength and long wear life.

The links can easily be assembled or disassembled by flexing the chain and tapping the link in or out. The chain should always be operated with the closed side of the barrel against the sprocket. Steel detachable chain is designed for moderate loads and speeds. Plain chain is used for transmission drives and with interspersed attachments for conveying applications. This type of chain is very economical and easy to install and repair.
